

Ahmed Baladi Writes About GDPR Enforcement for Financier Worldwide

Article | March 27, 2026

Financier Worldwide

Paris partner Ahmed Baladi recently authored the article “GDPR Enforcement: How EU Regulators Are Shaping AI Governance” in [Financier Worldwide](#). In the article, Ahmed highlights how the EU’s General Data Protection Regulation (GDPR) has become a pivotal enforcement framework for AI and will continue to evolve as the technology matures. Rather than displacing the GDPR, the AI Act preserves limited overlap as part of a decentralized model.

Ahmed also discusses the Draghi Report’s recommendation for a “more proportionate and predictable implementation of EU rules” and the ensuing Digital Omnibus Agenda.
