GIBSON DUNN

Gibson Dunn Advised Sponsors on TA’ZIZ Ammonia Project Financing

Firm News | November 12, 2026

Gibson Dunn advised the consortium of TA’ZIZ, Fertiglobe, GS Energy, and Mitsui & Co., as the sponsors on the financing of the TA’ZIZ Ammonia project in Ruwais, Abu Dhabi. ADNOC is a shareholder in both TA’ZIZ and Fertiglobe.

The project, with a planned production capacity of 1 million tonnes per annum of lower-carbon ammonia, will be one of the largest ammonia production facilities in the region. The financing, which was oversubscribed, was provided by a group of commercial banks from China, Kuwait, Spain, and Singapore.

The project forms part of the TA’ZIZ Industrial Chemicals Zone in Al Ruwais Industrial City, where TA’ZIZ is developing an integrated chemicals hub.

The Gibson Dunn team advising was led by partner Laleh Shahabi, and included partner Claude Jiang and associates Charles Case and Stephanie Li.
