Hart Energy Reports on Comments Made by James Hays at 2026 Energy Capital Conference

In the Media | June 5, 2026

Hart Energy

Hart Energy (subscription required) reported on comments made by partner James Hays at the publication's 2026 Energy Capital Conference. James said secondary funds that raise capital from retail investors are steadily growing larger. Bigger funds are "able to do much larger transactions."

"And, you have a single lead investor that's able to stand behind the entirety of the transaction," James said.
