

The ESG Digest: Insights into the European Corporate Sustainability Due Diligence Directive – Key Challenges for Companies

ESG Digest | July 8, 2024

The Corporate Sustainability Due Diligence Directive (CSDDD), one of the most debated pieces of European legislation of recent times, establishes far-reaching mandatory human rights and environmental obligations on companies of a certain size operating in the European Union—obligations that extend to their subsidiaries and even to their suppliers. In our two-episode podcast The ESG Digest: Insights into the European Corporate Sustainability Due Diligence Directive, Gibson Dunn lawyers and clients discuss the impact and implications of the new directive. In our second episode, Gibson Dunn partner Markus Rieder (Munich) and Juergen Gleichauf, chief compliance officer and chief human rights officer at Mercedes-Benz, discuss the challenges for companies in meeting the mandatory human rights and environmental obligations established by the Corporate Sustainability Due Diligence Directive (CSDDD). These include transitioning from national laws to the newly established European directive, and managing risks and setting up remediation measures in a complex supply chain. Juergen also shares examples of how companies can effectively implement a human rights-led corporate strategy.
