

Webcast: False Claims Act Hot Topics – Cybersecurity, Government Contracting, and Technology Companies

Webcasts | September 27, 2023

The False Claims Act (FCA) is one of the most powerful tools in the government's arsenal to combat fraud, waste, and abuse involving government funds. Nearly two years ago, the Department of Justice announced the establishment of the Civil Cyber-Fraud Initiative to utilize the False Claims Act to pursue cybersecurity related fraud by government contractors and grant recipients. Since the announcement of the Civil Cyber-Fraud Initiative, the government has continued to promulgate new cybersecurity requirements and reporting obligations in government contracts and funding agreements—which may bring yet more vigorous efforts by DOJ to pursue fraud, waste, and abuse in government spending under the False Claims Act. As we approach the second anniversary of the Civil Cyber-Fraud Initiative, as much as ever, any company that receives government funds—especially technology companies operating in the government contracting sector—needs to understand how the government and private whistleblowers alike are wielding the FCA to enforce required cybersecurity standards, and how they can defend themselves. Please join us to discuss developments in the FCA, including:

1. The latest trends in FCA enforcement actions and associated litigation affecting government contractors, including technology companies;
 2. Updates on enforcement actions arising under the DOJ Civil Cyber-Fraud Initiative;
 3. New proposed amendments to the FCA introduced by Senator Grassley;
 4. The latest trends in FCA jurisprudence, including developments in particular FCA legal theories affecting your cybersecurity compliance and reporting obligations; and
 5. Updates to the cybersecurity regulations and contractual obligations underlying enforcement actions by DOJ's Civil Cyber-Fraud Initiative.
